

Andrii Telnov

Full-stack developer

A JavaScript software engineer with primary interest in development of React.js and Next.js applications.

I am also interested in developing better mastership of **Node.js**.

I am searching for a position with a stable and supportive team where I'd be able to contribute and extend my portfolio. My aspiration is to master the upscaling of web applications built with React and Redux .

During my career, I have also had a privilege of leading a team of professionals and extensive experience of working directly with clients.

As a person, I strive to keep abreast of the latest trends and always open for improvements.
